

FOR IMMEDIATE RELEASE

Solution now available for companies who want to control legal costs

PITTSBURGH, PA Oct. 18 – InTune Business Advisors LLC, announces a solution for corporate law departments struggling with rising legal costs. As they attempt to focus more on strategy in a climate of growing litigation, companies are increasingly distracted by back-office uncertainty surrounding bill processing, bill review, budgeting and reporting. LegalEye™ v1.0 allows corporate law departments with large, complex and diverse matter portfolios to reduce costs, manage expectations and improve performance without sacrificing the quality of legal representation.

With LegalEye™ v1.0, corporate counsel can import bills with the click of a button, manage fee discounts and create custom bill reviews in order to enforce billing guidelines. LegalEye's™ budgeting and reporting capabilities also allow in-house counsel and senior management to align case objectives and strategy with financial constraints.

While many corporations have reigned in their direct spend, some are now looking to trim their indirect costs, of which legal expense ranks at the top of the list. “Streamlining the administrative and back-office aspects of matter management allows in-house and outside counsel to do what they do best”, says James A. Loeffler, Principal of InTune Business Advisors. “LegalEye's™ fee discount management capabilities also give our customers options with respect to alternative fee arrangements”, he says.
